## PROFESSIONAL EXPERIENCE

### Building21 Contract - AI Powered SaaS Application

Full Stack Developer

Philadelphia, PA

September 2025- November 2025

- Modernized an outdated behavior logging system for schools that relied on Google suite for **+1,000 users across schools nationally**, reducing logging time by 75% through **AI language assistant**
- Developed to fit existing company app suite and infrastructure
- Automated email notifications for events with **Amazon Warehouse Services Simple Email System (AWS SES)**
- Secured with role based access control (**4 roles**) with **Json Web Token (JWT)**
- Improved system reliability by optimizing database queries with **Prisma ORM**

### Launchpad Philly - Liftoff

Full Stack Developer

Philadelphia, PA

September 2024 - October 2025

- Built 3 full-stack web apps using **ReactJS, NextJS, Express, TypeScript, and ExpressJS**.
- Worked with both **SQL** (MySQL) and **NoSQL** (MongoDB) databases
- Created structured **implementation plans**, maintained organized **GitHub project boards**, and wrote **modular code**
- Designed 3 wireframes and mockups in **Figma** and **Excalidraw** to guide development
- Conducted **competitive product research** to inform feature design and UX decisions
- Incorporated **AI tools** into app features and workflows to drive smarter interactions and **product differentiation**

### Launchpad Philly - Lightspeed

Technical Instructor

Philadelphia, PA

July 2025- August 2025

- Led accelerated 6-week Python bootcamp for 9 students looking to get into a more difficult phase of workforce development program. Requirements including: passing the PCEP-03-02 certification exam, Codecademy projects, and a final performance review
- Provided one-on-one mentorship — addressing student habits, workflows, and mindset to help them succeed in a high-stakes, accelerated environment as well as long term
- 100%** of students passed the PCEP exam

## PROJECTS

### Focus Timer

ReactJS, TypeScript, TailwindCSS, Recharts

### Cibacopa Game Forecasting

Python, Flask, OpenAI, MySQL, Selenium

- Designed a gamified focus timer to support users with concentration challenges
- State management via **React Context API** for global app logic
- Session tracking with interactive productivity analytics
- UI/UX styling and compelling design

- Flask web app** with interactive visualizations: team ranking based on defense/offense metrics and season/recency.
- Used **OpenAI API** for matchup insights via data pipeline linked to MySQL-backed game database.
- Selenium for web scraping

## EDUCATION

### HIGH SCHOOL DIPLOMA

Furness High School

Philadelphia, PA

October 2021 - June 2024
