SKILLS, SOFTWARE & PERSONAL INTERESTS

Skills - Project Planning, Documentation, Communication, Organization, Collaboration, Attention to detail

Software & Coding Languages - JavaScript, Python, TypeScript, NextJS, ReactJS, TailwindCSS, MySQL, MongoDB

Personal Interests - Cycling, Trail Running, Basketball, Eagles, Boxing, Graphic Design, Food, Artificial Intelligence

PROFESSIONAL EXPERIENCE

Launchpad Philly - Liftoff   Philadelphia, PA
Full Stack Developer   September 2024 - Present

- Building full-stack web apps using **ReactJS, NextJS, Express, TypeScript, and ExpressJS.**
- Working with both **SQL (MySQL)** and **NoSQL (MongoDB)** databases
- Creating structured **implementation plans,** maintaining organized **GitHub project boards**, and writing **modular code**
- Designing wireframes and mockups in **Figma** and **Excalidraw** to guide development
- Conducting **competitive product research** to inform feature design and UX decisions
- Incorporating **AI tools** into app features and workflows to drive smarter interactions and **product differentiation**

Launchpad Philly - Lightspeed   Philadelphia, PA
Technical Instructor   July 2025- August 2025

- Led accelerated 6-week Python bootcamp for 9 students looking to get into a more difficult phase of workforce development program. Requirements including: passing the PCEP-03-02 certification exam, Codecademy projects, and a final performance review.
- Provided one-on-one mentorship — addressing student habits, workflows, and mindset to help them succeed in a high-stakes, accelerated environment as well as long term.
- **100%** of students passed the PCEP exam

Launchpad Philly - Foundations   Philadelphia, PA
Student   July 2024 - August 2024

- Completed 6-week Python course and earned PCEP-30-02 cert to advance to Liftoff full-stack program.
- Focused on scripting, logic, data structures, and clean coding practices

PROJECTS

Focus Timer
ReactJS, TypeScript, TailwindCSS, Recharts

- Designed a gamified focus timer to support users with concentration challenges
- State management via **React Context API** for global app logic
- Session tracking with interactive productivity analytics
- UI/UX styling and compelling design

Cibacopa Game Forecasting
Python, XGBoost, OpenAI, MySQL, Flask

- **Flask web app** with interactive visualizations: team ranking based on defense/offense metrics and season/recency.
- Used **OpenAI API** for matchup insights via data pipeline linked to MySQL-backed game database.
- Developed an XGBoost model with recency-based features, achieving **70% prediction accuracy**

Building21 Student Log
NextJS, Typescript, NeonDB, Prisma ORM, AWS SES

- Modernized an outdated behavior logging system for schools that relied on Google suite
- Tailored to existing company app suite and infrastructure
- Email notifications for events with **AWS SES**
- Role based access control with **JWT**

EDUCATION

HIGH SCHOOL DIPLOMA   Philadelphia, PA
                                                October 2021 - June 2024
